What Video format support a SONY Bravia to play movies from the Pen Driver?

The Entire World (Europe as well the US) is moving to Digital TV Transitions and therefore a new TV, generally is expected to enter in the home of the people.

Some of these TV, like the SONY Bravia supports a Pen Driver to display Video and Music trough its TV Operating System, but ... What Video format must belong the Movies in the Pen Driver to be played?

The format is the "Old" MPEG-1. In some cases we can support also the Theater Mode.

It is sophisticated because you can back to some seconds before you leave the movie if you move to see/watch some TV analog/digital.

When you back to watch the Pen Driver Movie, you will no lost the position in the movie ... and this allow you to save time ... for the maximum entertainment.
