Greetings,

Dr. Angela Belcher, from MIT with her team has produced ... an incredible lithium battery based on M13 virus.

[Click to visit Dr. Angela Belcher web page at MIT.](#)

What about to have a battery for your cellular phone or your new electric car, based on elementals, that are the base of Life?

It isn't interesting? ...

May be these elementals, these so called "virus" may got a special holiday in some exclusive place as well enjoy a discount for the Tesla Motor car ... 100% electric ... if the actual result will someday be extended to car batteries.

ROADSTER
100% Electric
0-60 mph in 3.5 secs
288 hp with rev limit at 14,000
236 miles per charge
[Download Full Spec Sheet >](#)

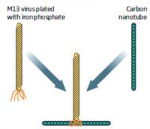

Availability:
Drive your home today
Refundable Reservation: \$9,900
Base purchase price \$101,500*

Lease for as low as **\$1,658/mo****

Growing better batteries

The M13 virus has been modified to bond with iron and phosphate ions, and with carbon nanotubes.

When used as a cathode, the amino-plated virus conducts lithium ions while the carbon nanotubes improve electron conductivity.
